SET FEE FOR STUD WORK AT STANLEY GRANGE STUD 2012 SEASON

We are introducing a voluntary scheme in which mare owners may pay a one-off fee for veterinary work carried out while the mare is at Stanley Grange Stud. This optional one-off advance payment would cover the costs of veterinary treatment necessary to get your mare in foal and monitor early pregnancy for up to **3 breeding cycles**.

This scheme allows treatment to be carried out without the worry of mounting costs. Mares often require considerable veterinary treatment to conceive and maintain pregnancy and even if your mare has had no previous problems often unforeseen complications arise. The benefits of this are twofold; it gives us the ability to treat your mare without the constraints of rising costs and affords you peace of mind that the vet's bill won't get too high!

Included in this scheme for up to 3 breeding cycles:

- Pre-breeding examination and examination of genitalia
- Endometrial swabs
- Treatment of endometritis as necessary (wash outs)
- Hormone injections (prostaglandins, chorulon)
- Scans up to heartbeat
- Caslicks procedure
- Nipping of twins if required

Please note that fees **NOT** covered include: Laboratory fees, pregnancy scans beyond heartbeat, attending foaling, regumate, hormone implants (ovuplant), endometrial biopsy, sedation, CEM swabs, EVA and EIA blood tests and other outside investigations.

The cost of this scheme is £300 inc VAT.

If you wish to take advantage of this scheme please inform the practice prior to the mare's arrival at stud if possible. The fee must be paid in full **IN ADVANCE** of the start of veterinary treatment.

Owners name and address.....

Mare's name.....

Payment method cash, cheque, credit/debit card

Please note that owners not wishing to take advantage of this scheme will receive itemised invoices on a monthly basis and the payment terms are 30 days.

Thank you and if you have any queries please do not hesitate to contact us.
